Self-check — Solution Selection Matrix, Benchmarking, and FMEA

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	Selection criteria agreed and weighted by importance	IMPROVE	
2	Every candidate solution scored against every criterion	IMPROVE	
3	Solutions ranked by weighted score	IMPROVE	
4	Benchmark comparison made and the gap noted	IMPROVE	
5	FMEA rows carry failure mode, effect, cause, S, O and D	IMPROVE	
6	RPN calculated as S x O x D	IMPROVE	
7	Action defined for the highest-RPN failure modes	IMPROVE	

Debrief check

Your matrix ranks solutions by weighted score, and every FMEA row has an RPN and an action for the highest scores.
